

Web Design Portfolio

Pranav Konjeti

Introduction

For me, web design is a form of art that allows me to express my creativity and bring ideas to life. This portfolio showcases a collection of web designs I've created either for personal software projects, or designs for local businesses through my web-development agency.

Each website starts as a mockup in Figma, an online design tool, where I spend around 10-20 hours bringing the design to life. After that, I spend another 2-3 hours translating the design to code using ReactJS and TailwindCSS.

On the following pages, you'll find a brief description of each design, including the color palette, design choices, link, date of creation, and the actual design.

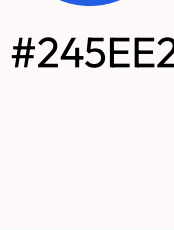

If the design appears blurry or unclear, each website is also live online and fully responsive on mobile, tablet, and desktop devices. Links are provided for convenient access

Crackd

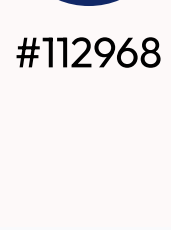

<http://crackdreidesign.vercel.app/>

Crackd is an SAT & ACT prep platform with over 30,000 users. I focused on redesigning the landing page to maintain its minimalistic feel while modernizing it with clear feature explanations, custom Figma graphics, and an updated layout. I chose a blue color scheme to align with the platform's identity.

What we've been doing since April 2024

200 → 1380

Crackd has been the most helpful source for SAT prep that I've found. The staff provide you with targeted practice questions that help you improve in any area that you struggle in. They worked with me one-on-one DAILY, which was honestly what motivated me to study consistently.*

★★★★★

A Game-Changer

Talem helped me discover a ton of competitions and extracurriculars that I didn't even know about like the Conrad Challenge or Envirothon. I even started my own club in school from an extracurricular I saw here. This is an amazing website which has helped me and my friends a lot!

— Lily, Junior from New Jersey

★★★★★

Best Site EVER

Talem is one of the most helpful sites. It helped me find Computer Science Competitions like USA CO which are really interesting to me especially because I love Computers! I also started doing Debate after finding Talem and now I'm preparing for Mathematics Competitions like HMMT and AMC 10, all of which I wouldn't have learned of if not for this website.

— Advik, Sophomore from Texas

★★★★★

Saved my College Apps!

I can not stress how helpful this site has been to me! I found some last minute activities and competitions I could put on my college application before I applied which helped me a ton! Kudos to the Talem Team for putting this amazing site together! Their college programs feature also helped me find a few programs at my favorite uni that I did over the summer.

— Ananya, Senior from California

★★★★★

Very Helpful to Me

Talem showed me a lot of extracurriculars I didn't know existed. Through this website, I found a passion for Model UN and joined my school's debate team as well. I feel like I have a real purpose now and this is all thanks to Talem!!

— Mira, Freshman from Colorado

★★★★★

Better than Anything Else

I found this website from a friend and did not expect much of it. I thought it was another highschooler run nonprofit, but I was wrong. Talem is a great website that I am sure has helped not only me, but also many other highschoolers in the process as well. The website is built very well and the user experience is really nice as well :)

— Channing, Junior Highschooler from Taiwan

★★★★★

Helpful to all students...

Here in India there are not many resources for us students. This website has helped me a lot in finding extracurriculars and competitions that I can do regardless of where I live. It has provided a lot of help to international students and since I want to study in the USA, Talem has helped me a lot with finding opportunities.

How it Works

- Free Consultation Session**
We'll start out with a **free** consultation session to see where you/your child is at and move from there!
- Follow the Plan**
Once we see where you're at, our team of tutors will create a comprehensive plan to follow along with mini-tests, mid-tests, and final-tests!
- Improve Exponentially**
For the next few classes, you'll get instruction tailored to focus on your weakspots and affirm what you already know. Get ready to see massive score increases!

Prices that make Sense

The average cost for private tutoring is **70 Dollars (Source)**. Our most expensive 1-1 package is **23\$** and we give you the same high-quality tutoring for a fraction of the price.

***If it's your first time with us, your first session is **free**

1 Session (60 Mins.)	3 Sessions (180 Mins.)	6 Sessions (180 Mins.)
We'll go over any topic you'd like and do questions - or practice the topic you struggle with the most. You will be asked to take a pre-diagnostic (free) beforehand. Best if you need to practice anything quick.	We'll spend a total of 3 hours going over all the topics you struggle with the most. You'll be assigned practice tests between sessions to work on to help you improve.	We'll create a personalized plan to fill in your weak spots and make sure you're able to tackle any question on the SAT. You'll be given lots of practice and a final test to lock in all concepts.

I thought you did a good job explaining things, and providing that extra explanation on top helped me understand. The content is well organized too.

Personally, this was my first time getting tutored for something since I'm usually hesitant about joining tutorials. However, you do a great job at explaining the content and questions as we go over them. You're patient and you make sure to go over questions until we understand. I really enjoyed this experience, thank you!

I think the sessions were amazing! You're patient, kind, and understanding. You're very good at teaching the topics and I can tell you already have a deep understanding of the topics which is nice because it comes very easily to you, which helps you teach it more efficiently, and as someone who wants to be a future teacher, you're someone who I definitely look up to. I've learned a lot, through your teaching itself as well as the methods you use to teach. Thank you so much!

I loved the slideshows. The direct practice after each explanation was extremely helpful and even when the explanations were a little weird, the steps were still helpful. I learned the most from the tricky questions, but in general they were good and helpful. Fantastic Sessions!
